

With a multicultural team of over 450 professionals, including engineers, physicists, project managers, and administrative staff located in **Barcelona (Spain), Cadarache (France), and Garching (Germany)**, F4E is the **European Union organisation** managing Europe's contribution to ITER, the biggest scientific experiment on the path to **fusion energy**.

ITER brings together seven parties that represent half of the world's population – the EU, Russia, Japan, China, India, South Korea, and the United States.

F4E also supports fusion research and development initiatives through the Broader Approach Agreement, signed with Japan – a fusion energy partnership which will last for 10 years. Ultimately, F4E will contribute towards the construction of demonstration fusion reactors.

The [F4E Traineeship Programme](#) offers university graduates the chance to contribute to the work of F4E and gain first-hand professional experience in various technical areas, engineering, project and contracts management, market intelligence, people's management, etc.

We are looking for motivated new talents with diverse academic and professional backgrounds to offer them **one-year paid traineeships**, provided they hold a university degree of at least three years by the closing date of applications.

The Programme is driven by a constant demand for students. Whether you are an engineer, physicist, lawyer, HR specialist, communicator, project manager, or have expertise in business administration or commercial and finance, **we want YOU to join F4E!**

Furthermore, it promotes an **Inclusivity and Diversity** policy by opening positions not only to European Union graduates but also to Ukrainians and candidates with physical disabilities.

**Deadline to apply: Monday, 10th of June 2024, 23:59 PM (CET+1)**
