STEM4HUMANITIES NEWSLETTER

STEM4HUMANITIES: STEM skills for Humanities

Project Overview

STEM4Humanities is on a mission to bring together the worlds of STEM (science, technology, engineering, and mathematics) and humanities education. Our goal is to tackle crucial issues in higher education by offering innovative online training, free educational materials, e-internships, and cross-disciplinary approaches.

Kick - Off Meeting, Macerata, Italy

At our kick-off meeting from 8.2.2023 to 9.2.2023, the 8 educational institutions - a mix of universities, NGOs, and colleges - gathered to set the stage for our project's exciting journey. Partners discussed their unique expertise and the valuable contributions they'll make to the project.

Kick-off Meeting

Initial Project Activities

What's Next

Initial Project Activities

🚀 Metropolitan College is teaming up with partners to develop a self-assessment tool for humanities professors. This tool will help them gauge their knowledge and skills in STEM and identify areas for growth.

🔍 Innovation Hive will collect results from humanities professors across partner countries. Mykolas Romeris University and Wroclaw University of Science and Technology will use this data to create an online training program, supported by the partners. This online training will uplift professors' skills in STEM.

📘 Metropolitan College will lead the creation of a STEM Teaching Handbook. This resource will empower humanities professors to seamlessly integrate STEM into their curricula and offer exciting cross-disciplinary courses to their students.

🌍 The University of Macerata coordinate all project activities. Meanwhile, the Georgian Int University and the Ivan Franco National University of Lviv are diving deep into the effective implementation of these actions.
What's Next

Our journey has just begun! Stay tuned for updates on the self-assessment tool, online training, and the STEM teaching handbook. Together, we're shaping a more diverse, inclusive, and empowered educational landscape.
