

As part of the UPinLT project of Mykolas Romeris University, I recently completed an internship at the law firm "Lano Solutions". The programme is designed to give graduates practical experience in their field of study.

The support from the University was excellent, especially from Laura Jakubsevičienė, who was very efficient in guiding me through the project. I would also like to thank Sergii Bedryga and Sergii Karasov for their invaluable

guidance throughout the placement. Their mentorship has greatly enhanced my understanding of the legal profession.

Overall, this placement has been an incredibly fulfilling and enriching experience that I would enthusiastically recommend to any student pursuing professional growth. The UPinLT programme offers a fantastic opportunity for both personal and professional development, particularly for those aiming to gain practical, hands-on experience in their chosen field.

During my placement, I had the privilege of working on real client cases, which provided invaluable insights into the practical applications of legal principles and procedures. Being entrusted with significant responsibilities, such as conducting legal research, drafting documents, and assisting in client consultations, allowed me to develop critical skills that are essential for a career in law.

This experience not only deepened my understanding of the legal profession but also strengthened my ability to analyze complex situations, communicate effectively, and provide solutions-oriented advice. The trust placed in me by my supervisors was both empowering and motivating, encouraging me to approach each task with diligence and professionalism.

Moreover, this placement enabled me to establish meaningful professional connections and gain a better understanding of the Lithuanian legal landscape, which will undoubtedly benefit my future career aspirations. I am immensely grateful for the opportunity to participate in this programme and would highly recommend it to other students seeking to bridge the gap between academic learning and real-world application. I would like to thank Mykolas Romeris University and Lano Solutions for this incredible experience!
